Education

The National Institute of Engineering, Mysore

Expected June 2027

Bachelor of Engineering in Computer Science | CGPA: 9.39 / 10

Experience

Tech Lead, OWASP NIE

July 2025 – Present

- Spearheaded 8+ events and workshops with attendance of 200+ students per event
- Delivered hands-on sessions on command-line tools, shell scripting, and PowerShell, equipping students with practical technical skills
- Managed end-to-end event execution including content planning, technical setup, and large-scale participant coordination

Projects

EventSphere – Event Ticketing Platform

GitHub

Tech Stack: React, Spring Boot, PostgreSQL, OAuth2

A full-stack event management platform enabling organizers to create events, sell tickets, and validate attendees in real time using QR codes.

- Implemented OAuth2-based authentication and role-based access control (RBAC) for organizers and staff, reducing unauthorized access to zero in testing.
- Designed transactional ticket lifecycle management with PostgreSQL, ensuring data consistency across concurrent booking requests.
- Built QR-code validation workflow and centralized exception handling, processing end-to-end ticket flows with consistently low API response times in testing
- Developed event thumbnail upload functionality, allowing organizers to attach images during event creation, enhancing the attendee browsing experience

EdgeShield – API Gateway Threat Logging System

GitHub

Tech Stack: Spring Boot, Redis, RabbitMQ, PostgreSQL, Docker

A developer-focused API gateway protecting downstream services from unauthorized access and request abuse at the edge.

- Engineered Redis-based rate limiter blocking abusive IPs with 429 responses, protecting downstream APIs from request flooding
- Implemented JWT authentication filter rejecting unauthorized requests before reaching business logic
- Built async threat logging pipeline via RabbitMQ capturing security violations with zero latency impact
- Exposed Admin APIs to monitor blocked IPs and violation stats persisted in PostgreSQL

Technical Skills

- **Languages:** Java, Python, JavaScript
- **Web / Frameworks:** React.js, Node.js, Express.js, Spring Boot
- **Databases:** MongoDB, MySQL, PostgreSQL, Redis
- **Messaging System:** RabbitMQ
- **Tools:** Git, Bash, Windows PowerShell, Docker
- **Core Concepts:** Data Structures & Algorithms, REST APIs, OOP, Operating Systems, Computer Networks, Agile Development, Digital Design

Achievements & Leadership

- Solved 450+ LeetCode problems with a contest rating of 1712 — top 12% globally on the platform.
- Finalist, SAP Labs Hackfest '25 — ranked in the Top 50 out of 4,000+ competing teams across India.
- 1st Prize – HackVerse 2025 | MIT, Mysore — Won 1st place by building a personalized learning recommender system, recognized for delivering a practical and scalable solution within the hackathon timeframe.
